

Physician Information

At Mountain View Medical Laboratory we are here to provide personalized service while trying to achieve the highest quality test results to aid in the diagnosis of your patient.

We have partnered with the leading manufactures' of laboratory diagnostic equipment. Our instruments use the same technology found in larger laboratories.

As a global leader in healthcare, Roche Diagnostics offers a broad portfolio of tools that help healthcare providers in the prevention, diagnosis and management of diseases

Sysmex is the leading manufacture of hematology and hemostasis laboratory instruments being the first company to bring the diode laser to hematology and use fluorescent flow cytometry for more accurate and sensitive counting of nucleated red blood cells.

With over a century of experience in microbiology, bioMérieux has unique expertise in culture, identification, antimicrobial susceptibility testing, and resistance mechanism detection of microorganisms.

Our current test menu includes over 80 assays performed in our Hemet laboratory. For our full test menu [click here](#).

80% of our laboratory test results are available same day.

Reporting is available via our dedicated webserver, fax and courier delivery. EMR interfaces are in progress at this time and should be available in the near future.

We are currently accepting Medicare and Private Pay patients.

We are in the processes of becoming a provider for other insurance companies.
